-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Claims 6-27 and 32-63 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8 July 2005.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 28, and 29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Anbinder in "White Pine Upgrades Terminal Line", on web page <http://www.tidbits.com/tb-issues/TidBITS-234.html>.

Art Unit: 2134

With regard to claims 1-5 and 28-31, Anbinder discloses network copy protection that prevents duplicate software from running on the same network. Each software transmits its serial number, and receives serial numbers from other executables. Anbinder discloses that if Quark's and White Pine's products each ran on a computer, they would each broadcast their serial number, and would only allow each other to run if the serial numbers don't match. This system allows for other copies to run on a single network, as long as each has its own serial number (was paid for). Anbinder does not specifically state that the distinctive number is the serial number. If it were not inherent in Anbinder that this is a serial number, it would at least be obvious to one of ordinary skill in the art to use a serial number as the distinctive number.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30 and 31 rejected under 35 U.S.C. 103(a) as being unpatentable over Anbinder.

With regard to claims 30 and 31, Anbinder discloses that the software checks for duplicate serial numbers during startup, and must check the number of serial numbers running on the network, but does not disclose network copy protection used with software sending encrypted information. The examiner takes

Art Unit: 2134

official notice that software often encrypts data before sending it over a network, to protect the software. It would have been obvious for one of ordinary skill in the art to use Anbinder's network copy protection with a software product that sent encrypted data for copy protection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Th 7 AM-3 PM.
